

TELEPHONE DIRECTORY

(Admin Guide)

The Telephone Directory has a very easy to use basic interface design, not only for users but also for admins. We have used MySQL for creating database. In our application, the responsibilities and rights of admin include:

- Approval of admin is necessary for addition of new user.
- Admin can edit and delete any user.
- Admin is responsible for editing, adding and deleting plans(data and talktime plans).

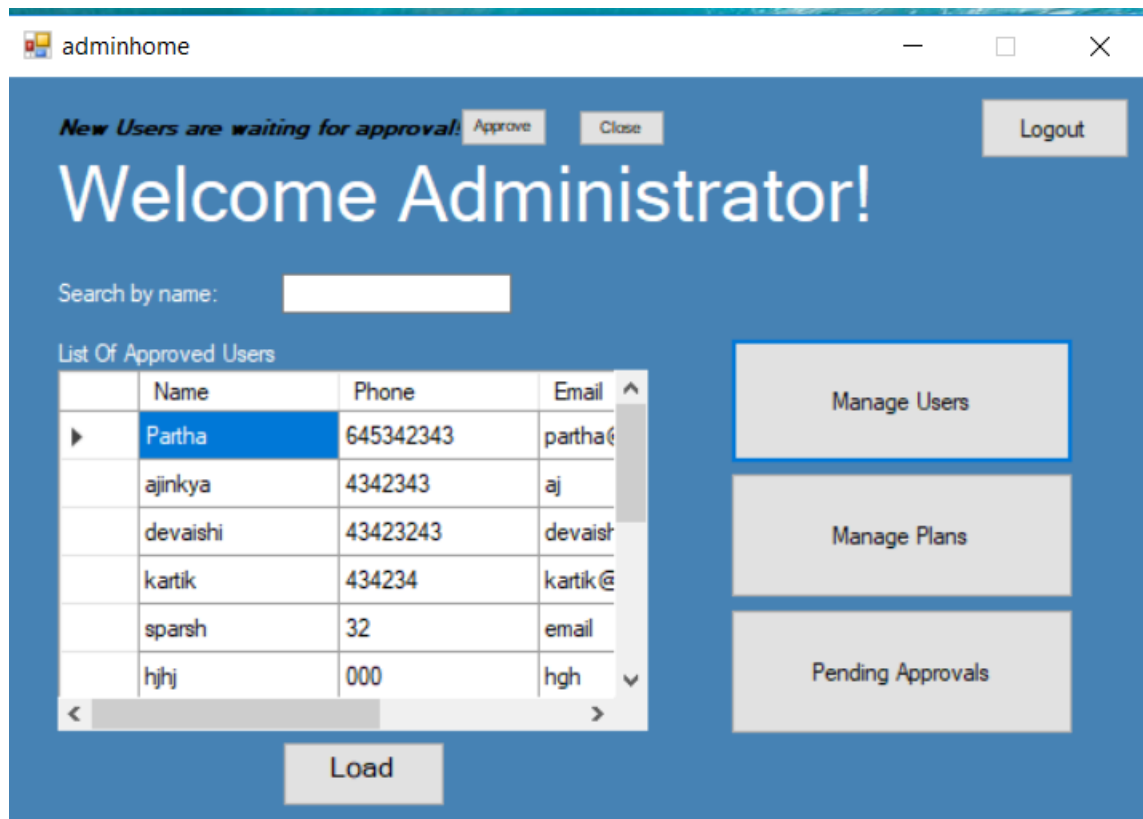

ADMIN LOGIN PAGE:

The screenshot shows a web browser window titled "LOGIN". The page has a blue background with a white login form in the center. At the top of the form, there are two tabs: "User" and "Admin", with "Admin" selected. Below the tabs, there is a text input field containing "sparsh123" and a password input field containing "*****". A "Show password" checkbox is located below the password field. Below the password field, there is a "Captcha" section with a "Google" logo and a "Type text here" input field containing "Google". A "LOGIN" button is at the bottom of the form. The browser window also shows a status bar at the top with the text "10.12.03.35" and "test".

- All the admins are already signed up, no person can sign up as an admin. Hence, admin can only login.
- During login, admin has to enter their username, password and write the captcha code.
- Admin must make sure to select the admin option while login as shown below.

ADMIN DASHBOARD:

- Once the admin logs into the application, he will be redirected to the admin dashboard as shown below.

1. Search

The admin dashboard has a table of approved users, the admin can simply search any user by its name and only the suitable users will be shown in the table.

2. Pending Approvals

This feature helps the admin to approve the pending users, as the name suggests. Further features are elaborated below.

3. Manage Users

This feature helps the admin to edit and delete the users from the database. Further features are elaborated below.

4. Manage Plans

The admin is responsible for maintaining the plans available for the user, and this feature helps for the same. Further features are elaborated below.

5. Logout

It will redirect the admin back to the login page.

6. Load

As the name suggests, it refreshes the form, so that you can check the latest changes in the users database (made by another admin/user).

PENDING APPROVALS:
