Clear

The user can purchase a data plan or a talktime in this form. He can select a plan from the table shown in the in purchase plan part. Once he selects a plan it will appear in the data ISP, price or talktime provider, price fields .To purchase the plan he should click on the buy button. After this he will be directed to a confirmation page where he can confirm the transaction , reject the transaction or view current plan. The purchased plan will overwrite his current plan and the required amount will be deducted from his wallet account. The user will be logged out of his account after he completes one transaction for security reasons.

Step 2 of 3

A screenshot of a Windows application window titled "Registration Step 3". The window has a blue background. It contains three input fields: "Username" with a person icon and the text "sayak", "Password" with a key icon and three asterisks, and "Confirm" with a key icon and three asterisks. To the right of the password and confirm fields is a checkbox labeled "Show Password". Below the input fields is a "Cancel" button on the left and a "Register Now" button on the right. A small dialog box is open in the center, titled "request Sent to Admin" with an "OK" button. The text "Step 3 of 3" is visible at the bottom of the main window.

Step 3 of 3

- When you open the program, the screen should look like this. If you are connected to database, the dot on the upper right corner will turn green.
- If you want to create an account, click on sign up. If you have an account, log in.
- Enter your name, email, phone number and then choose your ISP from the dropdown.
- Please note that this information, once entered is rather difficult to change. So verify the details entered before continuing.
- Click Next.(If you missed anything, use the back button to go to the login page)
- In step 2, we ask for additional information so that we can help you better!

- All the information in this page is optional and can be easily modified later. Here, you can choose a unique username. We shall alert you if the username is unavailable.
- Also choose a password. Do not forget this password! Changing the password is easy if you know your previous password, however if you forget your password or need to change any data, feel free to contact any admins.

**HOPE YOU FIND IT USEFUL!**
